

Dear friends and colleagues in our network of the Union of Risk Management for Preventive Medicine

How are you ? I hope you are doing well with your work and your family. I am fine and healthy as usual. However, I want to inform you that I have made my early retirement from Mahidol University, Thailand, since April of this year. I am now working as an Assistant President of the Bangkok Hospital Group which is the largest private hospital group in Thailand. The Bangkok Hospital Group consists of 14 hospitals throughout Thailand. We emphasize on tertiary care with modern technology and high quality services to both Thai people, Japanese and foreigners who live in Thailand. We would be glad to welcome you to our hospital if you have any chance to visit Thailand. However, I am interested in proposing some collaborative activities with your institute or any institute you may know for the following activities ;

1. Collaborative research in any field regarding clinical epidemiology, comparative clinical studies, preventive medicine using hospital database or any topic that you or your staff may be interested in.
2. Exchange of medical staff (medical doctors , and nurses) for short term visits (one week ,one month) or for long term visit (one year)

Please let me know your idea. I look forward to hearing from you and welcoming you to our hospital.

With my best regards to you and your family,

Som-arch Wongkhomthong, M.D.

Assistant President, Bangkok Hospital

2 Soi Soonvijai 7, New Petchburi Road, Bangkok 10320, Thailand
